

**BRINKS**

# SECURE TRANSPORTATION OF YOUR SENSITIVE RECORDS

## OVERVIEW

**Your organization wants to digitally convert its microfilm or microfiche archive. Yet, the information that is stored on microfilm media is highly sensitive. Securely transferring that information can be risky with standard shipping methods.**

BMI Imaging is pleased to offer Brink's Global Services as a highly secure method of media transportation. Built on the same infrastructure Brink's uses for transporting billions of dollars

in cash and valuables across the globe, this transportation platform can be trusted to safely

move your microfilm media. Brink's secure data solutions provide safe transportation of your sensitive microfilm and microfiche media from your doorstep to one of BMI's HIPAA-compliant, Northern California conversion facilities.

Brink's specializes in the secure transportation and handling of your valuable records to ensure your records are safe during transfer to BMI.

## FEATURES

- Risk management throughout entire logistical, shipping process including pick up, storage, secure transportation and delivery
- Service includes an armored truck and two armed guards that pick up your sealed media
- Every aspect of the transportation cycle is managed by qualified Brink's professionals trained in the trusted methods and expert processes for which Brink's is known

## BENEFITS

- Ideal transportation service for clients who have sensitive records where a higher level of transportation security is necessary
- Confidence and assurance that your sensitive information is protected while in transit
- Brink's takes liability for every shipment it handles anywhere in the world
- Rigorous controls ensure that media is delivered consistently, in a timely manner
